WORK EXPERIENCE

Full Stack Developer & Software Tester Teerthanker Mahaveer University (TMU)

02/2023 - Present

Moradabad, Uttar Pradesh, India

Achievements/Tasks

- Designed, developed, and maintained scalable full-stack web applications using HTML, CSS, JavaScript, Bootstrap, React.js, Laravel, and MySQL.
- Built and integrated an AI-powered counselling system using N8N automation and RAG-based AI, handling 1,000+ queries per month.
- Developed and managed TMU ONE Admin Dashboard features including RBAC, announcements, and feedback modules, and maintained a centralized CMS admin panel ensuring data integrity and scalability.
- Performed manual application testing for web and mobile applications, including functional, UI, and negative testing, validating workflows and edge cases.
- Supported operational coordination during university events, managing access workflows and stakeholder communication.

Associate Software Engineer Knocial India Limited

05/2022 - 12/2022

Gurugram Haryana

Achievements/Tasks

- Designed and developed responsive, user-friendly web interfaces using HTML, CSS, JavaScript, Bootstrap, and ASP.NET, ensuring cross-browser and cross-device compatibility.
- Implemented dynamic UI components and clientside validations using JavaScript, improving usability and interaction consistency.
- Performed UI testing, bug fixing, and layout optimization to maintain high visual quality and performance standards.

Communication Skills Automation Tools

LIVE PROJECTS

TMU ONE Admin Dashboard & Mobile Application (React.js & Flutter)

- Developed the TMU ONE Admin Dashboard using React.js with role-based access workflows, integrated and validated REST APIs using Postman, and ensured reliable frontend-backend data flow. Performed manual testing and fixed bugs for the TMU One Flutter mobile application on Android and iOS, ensuring stable functionality, accurate workflows, and high-quality releases.

TMU GYM Dashboard & Mobile Application

- Performed manual testing of the TMU GYM Dashboard and mobile application, including functional, UI, and negative testing to validate user workflows and system behavior. Tested APIs and data flows to ensure accuracy and stability, identified and fixed defects, and supported quality releases for Android and iOS platforms.

Academic & Conference Web Platforms (Laravel-Based Systems)

- Developed and managed multiple academic and conference websites using Laravel, PHP, MySQL, Bootstrap, HTML, CSS, and JavaScript, handling content management, on-page SEO, cross-browser compatibility, deployments, and large-scale data operations, including 150+ program pages and 800GB+ server migration, ensuring stable and scalable systems.

TMU AI Counsellor (AI-Powered Student Assistance System)

- Developed an AI-powered counselling chatbot using n8n automation, LLM-based agents, PostgreSQL, and Gemini, enabling accurate handling of university-related queries. Implemented secure webhooks and controlled prompts to restrict responses to TMU-specific data ensuring compliance, and reliable AI-driven assistance.
